

PLAYSTATION CLONE WEBSITE – COMPLETE PROJECT DOCUMENTATION

PlayStation Store is Sony's official digital gaming platform where users can browse, purchase and download games directly for PlayStation consoles.

It also provides featured collections, discounts and game offers, which inspired the store section included in this project website.

Project Summary

Part	Explanation
Project Name	PlayStation Clone Website
Project Type	Static gaming website clone based on PlayStation interface.
Main Purpose	To recreate PlayStation homepage, game pages and support form using HTML, CSS and JavaScript.
Technologies Used	HTML5, CSS3 and JavaScript.
Important Feature	Multiple game pages with PlayStation theme and live digital clock.

All HTML Tags Used

HTML Tag	Single-line Explanation
<!DOCTYPE html>	Declares HTML5 document.
<html>	Root element of webpage.
<head>	Stores metadata.
<meta>	Viewport and character settings.
<title>	Browser tab title.
<link>	Connects CSS.
<body>	Visible webpage.
<nav>	Navigation bar.
	Unordered list.
	List item.
<a>	Hyperlink.
<div>	Container.
<section>	Page section.
	Displays images.
<p>	Paragraph.
	Inline label.
<button>	Button.
<form>	Form container.
<input>	Input field.
<label>	Labels inputs.
<h2>/<h3>	Headings.

JavaScript Concepts and Methods

Method	Explanation
Date()	Gets current date and time.
getElementById()	Selects clock elements.
setInterval()	Updates values every second.
DOM update	Changes live clock text.

How Each JavaScript Section Is Generated

Section	Explanation
Clock Start	Runs when homepage loads.
Date Collection	Gets current values.
DOM Selection	Selects span tags.
Clock Update	Displays values.
Refresh	Updates every second.

Website Working Flow

Step	Explanation
Step 1	The browser opens the main HTML file and begins loading the PlayStation Clone homepage.
Step 2	The browser reads the head section and connects all required CSS files for layout, colors and styling.
Step 3	The navigation bar loads first with PlayStation logo, Games, Services, Shop, Hardware, Support and Sign In button.
Step 4	The homepage banner and featured game sections are displayed with images, headings and action buttons.
Step 5	CSS styling is applied throughout the page, including flex layout, spacing, alignment and hover effects.
Step 6	JavaScript starts automatically and updates the live digital clock with current day, date and time.
Step 7	When the user selects a featured game, the linked game page opens with overview, editions and screenshots.
Step 8	When the user selects Support, the registration form page opens and accepts user details.
Step 9	Footer content is displayed on every page and provides copyright and final information.
Step 10	The website works as a connected PlayStation-style gaming platform with smooth navigation between all pages.
